PROFESSIONAL SUMMARY

Senior Game Developer and Unity Game Developer with 3+ years of experience building 2D/3D games in Unity/C# for WebGL, Android, iOS, and VR. Develops and manages end to end production game development including gameplay systems, UI/UX, animation, multiplayer features, AR/VR, casino style games, hypercasual games, and board games. Integrates .NET backend services, SQL databases, REST APIs, database integration, Git based version control, deployment, and production maintenance for live game products. Experienced in cross platform development, debugging, performance optimization, project structure, backend systems, and agile team collaboration.

CORE SKILLS

Game Development: Unity 2D, Unity 3D, C#, Gameplay Programming, Game Design, Game Systems, UI/UX, Animation, Scene Management, Casino Game Development, Hypercasual Game Development, Board Game Development

Programming: Object Oriented Programming, Debugging, Performance Optimization, Java, SQL

Platforms: WebGL, Android, iOS, VR, Mobile, Cross Platform Development

Multiplayer: Multiplayer Game Development, Player Progression, Live Data Integration

Backend and APIs: .NET, REST APIs, Database Integration, SQL, Backend Services, Backend Systems

AR/VR and Tools: AR/VR, Roblox Studio, Unity Editor, Visual Studio, Git, Version Control, Deployment, Production Deployment

Design: 2D/3D Asset Design, Character Design, Character Animation, Unity Animation

PROFESSIONAL EXPERIENCE

Senior Game Developer | NextGen Solution | Karachi, Pakistan
May 2025 to Present

- Serve as Senior Game Developer leading Unity/C# development and ongoing management of casino style, hypercasual, and board game projects.
- Develop gameplay systems, game logic, UI features, and backend connected functionality across Unity game projects.
- Structured and manage the project's database and backend setup to support production game data and connected features.
- Established and manage Git and version control workflows for the project's technical development pipeline.
- Handle deployment setup and production deployment processes for Unity game builds.
- Defined and maintain overall project structure and technical workflow for Unity development and production maintenance.
- Debug, deploy, and maintain Unity game projects to support ongoing production stability and feature delivery.

Game Developer | Avanza Innovations | Karachi, Pakistan
Dec 2023 to Apr 2025

- Maintain a production Unity company product deployed across WebGL and VR platforms for live player use.
- Engineered gameplay systems, UI flows, and interactive Unity/C# features that support core product functionality.
- Debugged and optimized Unity systems to improve product stability, usability, and release readiness on WebGL and VR builds.
- Used Roblox Studio to prototype gameplay concepts before implementing validated features in the Unity production codebase.

Game Developer | Mean3 | Karachi, Pakistan
Sep 2022 to Dec 2023

- Developed casino style Unity games with gameplay logic and UI systems for WebGL, Android, and iOS platform builds.
- Implemented platform specific Unity/C# optimizations for mobile and WebGL performance and cross platform compatibility.
- Integrated Unity gameplay with .NET backend services, SQL databases, and REST APIs to support live casino game operations.
- Configured SQL queries and API controls to manage backend connected game data workflows for production game features.

Game Developer | DigiChowk | Karachi, Pakistan
Jan 2022 to Aug 2022

- Built multiplayer online expo gameplay in Unity/C# deployed across WebGL, Android, and iOS for live event interaction.
- Developed player tasks, progression systems, and event based gameplay systems that supported core expo player interactions.
- Integrated database connected Unity features to enable live user activity tracking and dynamic content updates during events.

Game Developer | HBH IT Solution | Karachi, Pakistan
Mar 2021 to Dec 2021

- Delivered Unity/C# game projects spanning FPS shooting, car racing, and GPS based location gameplay for mobile deployment.
- Built gameplay systems, level interactions, and mobile ready Unity features for Android and iOS builds.
- Implemented FPS shooting mechanics, vehicle controls, and map based GPS gameplay systems using Unity/C#.

Game Developer | Bestfit Solution | Karachi, Pakistan
Jan 2021 to Mar 2021

- Contributed to game design, 2D/3D asset creation, character design, and Unity animation pipelines for interactive game content.
- Supported AR/VR development and interactive Unity visual content for immersive gameplay experiences.

Lab Instructor | Sir Syed University | Karachi, Pakistan
Jul 2020 to May 2021

- Supported computer engineering students with software development, debugging, and practical lab assignments.

Game Developer | Startup Pakistan | Karachi, Pakistan
Jan 2018 to Mar 2019

- Developed custom ERP software features and maintained WordPress and Shopify websites for client delivery.

PROJECTS

WebGL and VR Company Product | Avanza Innovations
Technologies: Unity, C#, WebGL, VR, UI/UX, Gameplay Systems
- Contributed Unity/C# gameplay and UI work to a production product supporting WebGL and VR player experiences.
- Implemented interactive systems that enabled core product features and player user flows in production builds.

Casino Games Suite | Mean3
Technologies: Unity, C#, WebGL, Android, iOS, .NET, SQL, REST APIs
- Built casino style gameplay logic and UI screens in Unity/C# for WebGL, Android, and iOS deployment targets.
- Connected Unity casino gameplay to .NET services, SQL databases, and REST APIs for live backend game data handling.

Multiplayer Online Expo | DigiChowk
Technologies: Unity, C#, WebGL, Android, iOS, Multiplayer, Database Integration
- Developed multiplayer expo systems including player tasks and progression mechanics for live online event gameplay.
- Integrated database connected Unity features to support live event content updates and user activity during expo sessions.

FPS, Racing and GPS Based Games | HBH IT Solution
Technologies: Unity, C#, Android, iOS, Mobile Development, Gameplay Programming
- Developed FPS and racing gameplay systems with level interactions and mobile ready Unity/C# features for Android and iOS.
- Built GPS based location gameplay mechanics in Unity/C# to support map driven mobile gameplay on Android and iOS.

EDUCATION

Bachelor of Science, Computer Engineering
Sir Syed University of Engineering and Technology, Karachi | 2021
